

Year 1 Home Learning: Set Friday
Return by Wednesday 5th June

After half term we will be making our own animals out of junk modelling in the craft area. Your job over half term is to research an animal you would like to make out of junk modelling. Draw the animal and label the materials you will need. Please can we also ask for a donation of recycled materials to support the making of the animals. In addition to this please can you practice the following sums below. An example is there to show you how we have been working on these sums in school.

$$23+3=$$

Step 1- Break up the tens and units $23=20+3$ Step 2 add the units
 $3+3=6$ Step 3 $20+6=26$

Sums to complete:

$$23+2= \quad 24+2= \quad 31+6= \quad 15+3= \quad 27+2= \quad 38+1= \quad 41+2=$$
